

# Richard H D Townsend — Curriculum Vitae

## *Professional Preparation*

- University of Oxford; B. A. Physics; 1<sup>st</sup> Class Honors, 1994
- University College London; Ph. D. Astronomy; 1994 – 1997
  - Thesis: ‘Non-radial Pulsations in Early-Type Stars’ (Advisor: Prof. Ian Howarth)
  - Awarded UCL Harrie Massie prize for best Astronomy/Astrophysics PhD thesis
  - Awarded Royal Astronomical Society Blackwell Prize for best Astronomy/Astrophysics PhD thesis

## *Appointments*

- Fluno-Bascom Chair, Department of Astronomy, University of Wisconsin-Madison; 2020 –
- Professor, Department of Astronomy, University of Wisconsin-Madison; 2020 –
- Associate Professor, Department of Astronomy, University of Wisconsin-Madison; 2014 – 2020
- Assistant Professor, Department of Astronomy, University of Wisconsin-Madison; 2008 – 2014
- Associate Scientist, Bartol Research Institute, University of Delaware; 2006 – 2008
- Research Associate, Bartol Research Institute, University of Delaware; 2004 – 2006
- Limited Term Researcher, Bartol Research Institute, University of Delaware; 2003 – 2004
- Postdoctoral Research Fellow, University College London; 1998 – 2003
- Research Fellow, Reuters Limited, London; 1998
- Physics Teacher, Tuna Secondary Technical School, Ghana; 1997 – 1998

## *Recent Awards*

- NASA Astrophysics Theory Program : *Cardiology for Heavy-weights: Deciphering the Tidally Excited Oscillations of Intermediate & High-Mass Stars*; PI R Townsend
- NSF Astronomy and Astrophysics Grants Program : *Here be Dragons: Mapping the Instabilities of Massive Stars*; PI R Townsend
- NSF Software Infrastructure for Sustained Innovation Program : *SI2-SSI: Modules for Experiments in Stellar Astrophysics*; PI R Townsend
- NSF Software Infrastructure for Sustained Innovation Program : *SI2-SSE: Modules for Experiments in Stellar Astrophysics*; PI R Townsend
- NASA/NSF Theory & Computational Astrophysics Networks (TCAN) Program : *The SPIDER Network: Supernova Progenitor, Internal Dynamics and Evolution Research*; PI R Townsend

## *Software & Infrastructure Development*

- Leading UW-Madison’s participation in the *Modules for Experiments in Stellar Astrophysics* (MESA) project, a multi-institutional open source software project. MESA is used by a worldwide community of scientists (around 900, as of 2019) to simulate the internal structure and evolution of astrophysical objects from gas-giant planets to white dwarfs to supermassive stars. I serve on the MESA Administrative Council, which establishes the science roadmap for the project and oversees all MESA-related education and community engagement activi-

ities, and on the MESA Technical Council, which guides the technical development of the software.

- Creating and further developing the open-source *GYRE* stellar oscillation code. Since its release in 2013, *GYRE* has quickly established itself as the state-of-the-art tool for asteroseismic analyses of oscillating stars, and has been adopted by other research groups to yield over 100 scientific publications.

#### *Institutional Service*

- Serving on the Organizing Committees of the IAU Working Groups on *Massive Stars* and *Active OB Stars* (vice chair).
- Serving on/chairing time allocation committees for the *Hubble Space Telescope* and *Chandra X-Ray Observatory*.
- Serving/chairing grant review panels for NASA.
- Serving as referee on numerous journal papers.
- Serving on the Scientific Organizing Committees for the *IAU Symposia* 272, 307 and 329 conferences.

#### *Academic Service*

- Advising graduate students within the UW Department of Astronomy: Brittin Borland (MSc '12), Nick Hill (PhD '15), Chris Bard (PhD '16), Jacqueline Goldstein (PhD in progress), Aaron Lopez (PhD in progress)
- Creating the new Astronomy 103 Online class, built around bespoke multimedia products that include virtual observatory lectures, *2-Minute Universe* mini-lectures, and the *At Play in the Cosmos* computer game (developed by GEAR Learning with my consultative input).
- Chairing the UW Department of Astronomy, and serving on and/or chairing the computing, web, admissions, colloquium, undergraduate, awards and prelims committees.
- Serving as the faculty senator for the UW Department of Astronomy.
- Serving on the UW Advanced Computing Infrastructure committee.
